STEEL FILES

Choosing The Right File

Shapes	Types of Files
	Hand, Flat, Flat Rasp, Mill
	Half Round, Half Round Rasp.
	Triangular, Saw Heavy Taper, Saw Slim Taper
	Round
	Square

File Cut	
Single Cut	Single Cut files (mostly) all Saw Files are Single Cut are used for sharpening and edging applications e.g. sharpening of saws where the work piece is hard, point of contact is less and finish is required.
Double Cut	Double Cut files need less effort for filing and also give good surface finish.
Bastard Cut	For stock removal and coarse finish
Second Cut	For moderate stock removal and medium to coarse finish.
Smooth Cut	For smooth surface finish
Rasp Cut	Special cut formation for rapid stock removal from surface or softer materials like wood or leather

Notes:

- * A new file should be used with light pressure in the beginning, preferable on a surface which has been files earlier.
- * In case of clogging of file teeth, clean the teeth with a soft metal wire brush.
- * Use the files for cutting in the forward stroke only.
- * Filing jobs should be held rigidly.

STEEL FILES - MACHINIST'S FILES

FLAT

Size mm	Bastard	2nd Cut	Smooth	Std. Pkg.
